PROFILE

“Versatile Full-Stack Developer with expertise in both backend and frontend development. Skilled in Node.js and Express.js for building robust APIs, database management, and server-side logic, as well as React and React Native for crafting dynamic web and mobile applications. Passionate about creating scalable, user-friendly applications, ensuring seamless performance from backend architecture to frontend interfaces.”

WORK EXPERIENCE

Delta State University May 2026 - Present
Frontend Mobile Development

- Made use of React-native(Expo) for the application frontend interface
- Employed as a Frontend Mobile Dev to build an app and intergrate it to the university’s server
- Also developed a seperate part of the app to intergrate with Delsu’s ODL program, allowing their students and mentors assess their portal features from the app
- Came up with the Ui design assisted by Okokon Ewomazino

Carrb May 2025 - Jan 2026
Full Stack Mobile Development

- Made use of React-native(Expo), along with firebase for authentication and database storage.
- Employed as a Full stack Mobile Dev to fine-tune the company’s app
- Also developed new features for their update, including an in-app call system, notification system, login restrictions, etc.
- Worked with the product designer to make UI changes that have left the company satisfied so far.

Adric Phone Stores January 2025 - April 2025
Full Stack Web Development

- Spearheading the development of the company’s entire website using the MERN stack (MongoDB, Express.js, React, Node.js).
- Handling both frontend and backend development, ensuring seamless integration and performance optimization.
- Writing efficient and scalable code to ensure a smooth user experience.
- Implementing RESTful APIs to manage and display dynamic data for the website.
- Utilizing Git for version control and collaboration across development teams.

TECHNICAL SKILLS

• Frontend Development

- React.js & Next.js – Components, props, state, hooks
- React Native – Mobile app development using expo and expo related tool
- JavaScript (ES6+) – Functions, event handling, promises
- TypeScript - Alternative for Js
- HTML & CSS – Basic structuring & styling
- Tailwind CSS – Utility-first styling
- Bootstrap – Responsive design & UI components

• Backend Development

- Node.js & Express.js – Building APIs, routing
- C# dotnet (.Net) - Alternative to Express.js
- MongoDB & PostgreSQL – Database operations & querying
- Firebase and Firestore- Authentication and Database.
- Authentication – JWT, Passport.js for user authentication
- Testing – Jest for unit testing
- API Development & Testing – Postman for API testing and documentation

• Other Essential Skills

- Git & GitHub – Version control basics
- API Integration – Fetching & sending data
- Debugging – Identifying and fixing issues

Roatory

October 2024

Frontend Web Developer

- Collaborated with a team to build the company's website, focusing specifically on building user dashboards.
- Utilized React and Tailwind CSS for building responsive, dynamic user interfaces.
- Employed TypeScript for type safety and better maintainability.
- Used Git for version control and efficient collaboration with the team.

Zee Designs

July 2024 - August 2024

Full Stack Web developer

- Developed the company's website based on provided designs using EJS and Express.js.
- Integrated MongoDB for database management.
- Utilized Git for version control and collaborative development.

Interkel Nig.

AUGUST 2024 -

Web Development instructor

OCTOBER 2024

- Designed and implemented a comprehensive web development syllabus.
- Taught students fundamental and advanced concepts in frontend and backend development.
- Provided hands-on guidance in technologies such as HTML, CSS, JavaScript, React, Node.js, and Express.js.
- Assessed student progress and provided feedback to improve their coding skills.
